Basic Face Antiaging

Basic Face Antiaging

Facial hydrating and rejuvenating treatment.

Simildiet™, with its new “Basic” line offers cosmetic solutions in face and body treatments by means of a comprehensive range of products for professional use. These highly effective products of maximum quality are designed to be applied topically and particularly with the following beauty therapy systems used in the aesthetic field (ultrasound, transdermal electroporation, iontophoresis, depressotherapy, vacuumtherapy, radiofrequency).

Basic Face Antiaging (Basic Face Antiaging)

It contains the basic and fundamental active ingredients which are essential for an overall, effective antiaging facial treatment: Hyaluronic Acid, Organic Silicon and DMAE.

Complete antiaging effect, regenerating, repairing, anti-oxidant, restructuring, hydrating, toning, tautening and anti-flaccidity. Particularly indicated in antiaging treatments: smoothens wrinkles, brightens the skin, tightens skin pores, improving the skin texture, quality and freshness.

It may be combined with **Idebenone** to achieve optimal results.

COMPOSITION

Sodium hyaluronate, Methylsilanol mannuronate, Dimethyl mea.

PRESENTATION

Box containing 5 vials of 5ml each.

RECOMMENDED PROTOCOL:

- 1 session a week during 4 or 6 weeks.
- 1 session every 15 days during 2 or 3 months.
- 1 monthly session for maintenance.
